

It's Time to Approve the Bayou Bridge Pipeline

For more than two years, the Bayou Bridge Pipeline has been carefully planned and thoroughly vetted to ensure the safety of Louisiana communities. The natural resources of the state will be protected and restored during and after construction of this state-of-the-art pipeline.

In fact, the U.S. Fish and Wildlife Service and the Louisiana State Historic Preservation Office have each concluded that the pipeline will result in no adverse effects.

And, the Louisiana Department of Natural Resources, Office of Coastal Management recently issued the Coastal Use Permit bringing the project one step closer to beginning construction.

The Bayou Bridge Pipeline is committed to meeting or exceeding all applicable federal, state, and local safety regulations.

It's time to approve the Bayou Bridge Pipeline and advance this important infrastructure project to strengthen and diversify Louisiana's energy infrastructure system.
